

Typing Tutorial

"SURVIVAL" TYPING SKILLS

[Order Now!](#)

Who else wants to type 20 to 30 words per minute...
in 2 weeks or less?

**"Give Me 2 Weeks and I'll have
you typing 20-30 words per
minute - Guaranteed!"**

"No Kidding! It really works!"

Dear "Two fingered" friend,

Sick and tired of "hunting & pecking" away at the keyboard
with **two fingers** at a snail's pace?

Embarrassed to have anyone see you **fumble** at the keyboard?

Want to get "up to speed" and type what others can do in a
few minutes?

Well this might be the most important letter you ever
read!!

Here's why...

It won't take 6 Months!

With **traditional typing class** you probably **lost dignity,**
patience, time and money over many months -- while
retaining a lot of **frustration.**

This **"26 Key Typing Tutorial"** ebook can change all
that...

A lot of typing tutorials exist on the Web and we get
dizzy just surfing through them trying to figure which one
might work.

Some of them are books... some of them are software --
this ebook takes the best of both!

With the "26 Key Typing Tutorial" -- You read the book and do the exercises right on your computer screen... on the same keyboard you use everyday!

This program is different in 3 Ways!

Any typing tutorial you choose should contain three basic features before you consider buying it:

1. It should keep you excited and **fully engaged** in what you learn, while **looking forward** to the **next section** or lesson -- with even a little impatience to keep forging ahead.
2. It must teach you on the **actual keyboard** you will use in your work -- either at **home or** at the **office**.
3. **It must work quickly** by getting your attention and **cut out all of the nonsense** you will never use anyway.

"Survival Typing"

Let's list some of the gripes you and everyone else felt about their forced term in typing ~~jail~~ class.

Remember the "Karate Kid"?

Well we don't agree with the master karate teacher making someone wax cars for three months and not telling them this motion translates into wiping up someone on the mat -
- how boring!

Let's face it, traditional typing class rates as boring to the max... and you don't learn very well bored stiff!

However we turn this into a fun exercise right from the start and let you start working all your fingers right away knowing while you do it.

You want convenience!

Typing classes usually start first thing in the morning or late in the evening.

Your skills and attitude both "droop" at these times.

We let you **work when you feel fresh** and at **your own pace**.

No Boring "Typing" Book!

Whoever designed this torture device wanted to break spirits right away... or else they got paid by the pound on all books sold!

Traditional typing books take forever to get to the point.

We offer the faster results in only a few dozen pages instead of several hundred.

Learn on the Actual Keyboard you'll use!

In traditional typing class you don't learn on the actual keyboard you use in your work!

Even identical models have different touch, feel and reaction time...

In traditional typing class you have to take what you learn in a classroom and translate it to the feel of your own keyboard at home or at work... what a waste of time!

With our approach you learn on your own machine... a critical part of quickly learning to type.

Get the "Big Picture"

Typing teachers (in school or adult education classes) don't help you understand how the way they teach will help you put it to practical use.

They just sit up front and drone with repetitive instruction that really doesn't help you "understand the big picture" of what you really want to accomplish.

On the other hand...

We want to get you typing twenty to thirty words per minute after completing the 26 tutorials in this book along with a high degree of accuracy.

Twenty five perfect words per minute after our course gives **more value** than forty or fifty words with a string of **errors**.

We explain in the ebook where this idea for the course originated along with the techniques it uses to harness

the power of your subconscious mind to 'turbo-charge' your results.

"Just the facts ma'am!"

FACT--Traditional typing courses teach things you don't need to know...

They put your hands through gymnastic exercises to use the numbers and other keys -- which you will end up hunting and pecking for anyway!

(Ask an experienced typist and see how many can use the top row of keys without looking... typing numbers, dollar signs and all of the numbers.)

It's no sin if you "LOOK" at the key board while you learn to stretch and stroke the keys... especially the tough ones like z and x or b.

If you do this at first, eventually you'll get out of the habit and take pride in doing the old "touch" typing.

Why do my fingers hurt?

The techniques taught in conventional classes apply to old manual typewriter keyboards -- and they teach through straight repetition.

Our approach, however, employs the power of your **subconscious mind**.

It can help you kick into a mode where your mind and body -- especially your fingers -- engage in the typing.

With our method -- you can **teach your fingers how to 'spell'** while **your mind thinks** the words.

Does this come under the heading of autonomic reflexes? We don't know -- and won't say one way or the other. You make up your own mind after finishing the course and start working at your keyboard.

No Awkward Classroom setting

Remember the embarrassment of sitting in typing class with kids who whizzed through the exercises -- those "naturals" at whatever they did -- while you counted at least six fingers and two thumbs on each hand!

We forgive and forget that whole rotten experience... just like a completed jail sentence.

Start out thinking that you never saw a typing keyboard before!

Let's get started...

Here's what you get in this breakthrough Typing Tutorial:

- Learn right at your own keyboard -- at your own pace -- with easy to follow exercises that first teach you the twenty six keys and then (this is the best part) takes you through a series of exercises that literally **burns those reflexes into your subconscious mind...** teaching you to **"spell" with your fingers** -- like the best touch typists.
- The revolutionary ebook format lets you read the exercises and then practice the steps right in the ebook itself on the same page as the exercise!
- Employ the power of your subconscious mind by completing exercises you won't find in any other typing tutorial.
- Proceed at **your own pace...** do as much or as little as you have time for.
- **Understand the mindset** that creates a "touch typist".
- **It doesn't matter if you have a PC or a MAC!** We use the FREE Adobe Acrobat Reader program to deliver your typing tutorial -- the most stable and flexible ebook program available. (If you don't have Adobe Acrobat Reader we'll show you how to get it FREE right over the web.)
- The Best News -- you can **download the ebook right now** and get started on your way to typing with 10 fingers... instead of only 10!

Get all this for our *introductory price*

of only \$19!

Act immediately and receive the following bonuses...
